LOCAL HIGH TEAM HANDS AUBURN 34 TO 0 BEATING

Nevada City High Has Too Much Heavy Artillery for Auburn Aggregation

The supposedly crippled Nevada City High School football team threw its crutches to one side Saturday and whaled the tar out of the Auburn High School football team. It was the first played this year on the home ground and the local boys arose to the occasion by giving an exhibition of power and speed that amazed even their most loyal supporters.

Old man weather played the dirtiest trick of the day when he pulled his first rain of the year on the same day as the first home game. The crowds stayed away in droves, but the 200 who braved the elements were well repaid by the exhibition given.

Because of the fact that about four of Nevada City's regulars were practically out with injuries, the two teams trotted out on the gridiron with very little to choose beween them. Coach Barron demonstrated the wisdom of developing substitutes right along with the regulars. The extras stepped apace with their more experienced mates and one could detect no let up in the brand of ball played.

Starting with a bang, Nevada City received the opening kick off and without losing possession of the ball carried it straight down the field for the first touchdown. Pierce also converted on the same play. That gave Nevada City a 7 to 0 lead right off the bat.

In the same period, after an exchange of punts, right tackle Casci blocked an Auburn punt and right end Tamblyn recovered for the locals on Auburn's 12 yard line. Nevada City gained a few yards on two line plays and Pierce on an end run chalked up the second touchdown. The conversion failed.

Score Nevada City 13, Auburn 0 at the end of the first quarter.

In the second period after exchanging the ball several times by kicks, Pierce, on a double reverse, dropped back to pass from Auburn's 45 yard line. Doyle, who has been doing some good work at left end of late, sprinted down the field and caught the pass on the 10 yard marker. On the next play, Chapman on a short end run, ran standing up for the third touchdown. Fullback Oates, who had not been expected to play, plunged his way toa conversion, giving Nevada City 20 points in the first half.

At the start of the second half things went along pretty smoothly until the Auburn safety man fumbled a punt. Proving himself a good ball hawk, Bob Tamblyn recovered on the the 45 yard line and ran to a touchdown. Oates passed successfully to Tamblyn, making the score 27 to 0

In the fourth quarter, Auburn gained her way down to Nevada City's 18 yard line where they lost the ball on downs. After gaining two yards on as many plays, Oates dropped back for a punt. On the play the Auburn left tackle broke through and drew Pierce slightly out of position. Pierce blocked his man out of the play but in doing so he backed up far enough so that the punt hit him on the shoulder. The ball bounded straight back toward the home goal line and was recovered by Auburn on the 43 yard line. A buck off left tackle lost two yards and a five yard penalty brought the ball back to the 11 yard line.

A few minutes later as the gun sounded, Pierce intercepted a pass and ran the ball back 32 yards to the Auburn 27 yard line.

Pierce played an exceptionally brilliant game at half and full. On one occasion, when on an end run the Auburn back had a clear field to a touchdown, Pierce smashed his way through two would-be Auburn blockers and outrunning the ball carrier, made as pretty a flying tackle as you would want to see.

The Nevada City lineup:

Right End	Tamblyn
Right Tackle	Casci
Right Guard	Jones
Center	Tucker
Guard	Schiffner
Left End	Doyle
Quarterback	Hoffman
Right Halfback	Chapman
Left Halfback	Barker
Fullback	Pierce

Substitutions—Joy for Doyle, Flint for Casci, Rozynski for Tucker, Oates for Barker, Pierce for Chapman, Barry for Sharp, Whitley for Jones, Harry Brown, Toccalini and Clark did not play because of inpuries.

NEW STAGE TO AUBURN PUT IN SERVICE TODAY

A new 10 passenger stage has been put into service starting today. The Nevada County Narrow Gauge Railroad will use it in continuing the stage line to Auburn. For the past three weeks, pending the arrival of this new stage, the railroad company has borrowed a stage from the Pacific Grayhound lines to start the service.

The stage will connect with the main line busses that go through or to Auburn. It will make three round trips daily and two on Sunday. Round trip rates will be only one and one third times the one way rate and will be good for 21 days.

W. G. Marlette, a one time employe of the Pacific Grayhound lines, is the operator. He is a trained and experienced man in the stage and bus business. He will make his home in Nevada City.

The new stage has a ten passenger capacity and has a large express and freight compartment. It has a 6 cylinder Hall Scott engine and 6 heavy duty wheels.

It will leave Nevada City daily at 7:15 a. m. 12:30 p. m. and 3:45 p. m.

The National hotel will handle the local agency for the railroad company. The stages will leave from and return to the National hotel.

MINING MEN TO LOOK AT MILL IN SAN JOSE

Robert Spencer, mining engineer, who is in charge of the mining operations on the old Stockton Hill mine tailings, is going to take a test run of his ore to the West Coast Development Company in San Jose. This company is manufacturing the new Humphrey's Hammer Mill in that city and has made an offer to mill and amalgamate for exhibition purposes any amount of ore up to a carload.

If the first run of Spencer's ore is satisfactory in recovering gold, it is expected that a larger shipment will be made. T. Wight, one of Spencer's assistants on the Stockton Hill job, is making the trip with Spencer. These men will both inspect the new mill. In the Stockton Hill work they are with the Calavada Mining company of Nevada.

Work will probably continue under the direction of Fred Oppenlander during the absence of Spencer and Wight.

Spencer's home is in San Francisco and while in the bay district he will visit his wife and family there.

LOCAL MEN RESCUE INJURED FROM WRECK

Clyde Mugford and Louis Riley, both of the Valley Meat Market in this city, were standing at the 12 mile house this way from Sacramento yesterday afternoon. They saw a Ford roadster with five young people in it come dashing down the road at a tremendous rate of speed.

Passing the local men by about 50 feet, the roadster came to a turn in the road that it was unable to negotiate because of the rate of speed it was traveling. The car skidded off the road and turned completely over.

Mugford and Riley hurried to the rescue and pulled three of the young people from the wreckage. The other two had been thrown clear. The local men piled all five of the injured into Riley's car and drove them to the hospital in Sacramento.

The young people, two of them whom were girls, were about 19 years of age. Their homes were in Sacramento, Lodi and Newcastle. All will recover with the possible exception of one of the girls from Newcastle. She had ribs and a collar bone broken and seemed to have suffered some lung injury. The others suffered some deep cuts and some minor bone breakages, but will recover in time.

YOUNG PEOPLE WED SUNDAY AT LOCAL CHURCH

Miss Margaret Toccalini and Donald Steger Take Vows in St. Canice Church

Yesterday at high noon, in the presence of about 80 friends and relatives, Miss Margaret Toccalini and Donald Earl Steger took the holy vows of matrimony at the altar of St. Canice Catholic church in this city, Rev. Father O'Reilly performing the impressive rites which united two of Nevada City's highly esteemed and prominent young people.

The decorations of the church and its altars made a pretty setting for the wedding ceremony. Two tall lighted candles on either side of the altar steps and beautiful lighted candelabra on the altar rails lent a soft light to the scene and two tall baskets of stately white chrysanthemums with softly tied bows of pink tulle gave added charm to the happy scene.

Yellow chrysanthemums in smaller baskets adorned the chancel, the main altar being adorned with large yellow chrysanthemums set in a background of greenery. The side altars carried out the decorative scheme in pink chrysanthemums and greenery with tall lighted candles.

As a prelude to the entrance of the wedding party in the church Mrs. Rosetta Johns of Grass Valley sang, with organ accompaniment, "Because," the tender words and the sweet cadences of the song blending so harmoniously with the joyous hearts that were soon to enter and form the central figures in the setting of flowers, candelabra and greenery that beautified the altars and the chancel of the church.

Mendelessohn's beautiful wedding march, pealing from the organ with violin accompaniment, annuonced the formal entrance of the bridal party, Noble McCormack, Jr., as ushers; Biss Verda Renner of Sacramento, maid of honor; Miss Beatrice Bone of Grass Valley, bridesmaid, and then came little Francy Bowle of Sacramento, a cousin of the bride as flower-girl preceding the bride who entered on the arm of her father, Baptiste Toccalini,.

The bride was resplendent in her bridal robe of white French crepe, the long bridal veil held up by little Genevieve La Bara, the brides' cousin.

The bridegroom, with his best man, Robert Steger, Jr., his brother, met the bride at the chancel, the attendants of the bride and groom taking positions at the right and left and facing the contracting parties, the train-bearer standing a short distance and directly behind the bride.

When the solemn words that tied for life two hearts and two souls and Father O'Reilly had asked Divine guidance for them on their pathway through life the bridal entourage returned to the vestibule of the church the organ again filling the church with the joyous measures of the wedding march.

An informal reception was held by Mr. and Mrs. Steger in the vestibule and congratulations and sincere wishes of happiness flowed from the lips of the many friends who had witnessed the happly culmination of the engagement of two Nevada City born young people.

Amid a shower of rice which closely resembled a hail-storm, the young "newly-weds" reached their automobile and were driven to the National Hotel where with their guests, they enjoyed a wedding breakfast. The tables of the reserved dining-room of the upper lobby of the hotel had been decorated in flowers of yellow and pink shades with greenery of dainty sprays of maiden-hair ferns.
After the repast was enjoyed and an hour of merriment spent at the tables, these set in a formation which brought the bride's table in close view of all the guests.

The bride's bouquet was caught by Miss Lois Eden.

Mrs. Steger is the daughter of Mr. and Mrs. Baptiste Toccalini and is a young lady of charming personality and has endeared herself to all who know her. She is a graduate of Nevada City High School and

(Continued on page four)

FIRE SEASON NEARLY OVER IN TAHOE FOREST

With only 572 acres burned over in the Tahoe National forest this year and the promise of early rains putting an end to forest fires in this district for the year 1932, the local forest office personnel are well satisfied with the way the fire situation has been handled.

While there were 130 fires in the forest this year they were handled very efficiently and only six fires in the Tahoe Forest burned over 10 acres.

For the state of California as a whole the local forest officials state that the fire season of 1932 has been less destructive than the average for the last five years. This in spite of the very disastrous fire in the Santa Barbara forest, one of the most destructive fires in the history of the state. For the entire state only 271,000 acres were burned over, against 476,000 last year. The five year average is 354,000 acres.

The forest service is building a warehouse in Nevada City for a storage of supplies and machinery during the winter months. The foundation will be finished in a few days.

The ranger station at Big Bend, about 35 miles from Nevada City is being enlarged and rebuilt. Ranger J. A. McIntosh is in charge of this station.

The road crew under L. L. Land is now working on the Texas Hill road. There are about 15 men in this crew at present. They have been building a series of motorways. The forest service roads and trails in the Tahoe forest have been greatly improved and extended this year which is of benefit not only in improving communication between forest service stations but also have proved advantageous to the general public.

AMERICAN LEGION SOON TO GIVE EXTRAVAGANZA

(Special to Nugget)

Many thousands of years ago one king Gilgamesh gathered together the available literature of the time. This collection consisted of Mythology, Poetry, Historical Chronicles and Fiction.

Among these bits of literature was the story of Cinderella and it is interesting to know that this story is one of the oldest pieces of fiction known to man. All this and more we learned during an exclusive interview with J. Richard Pavilla, who is directing the Fairy Extravaganza, based on the story of Cinderella and adapted for the stage by Mr. Pavilla.

The spectacular ballet scene is already in rehearsal and promises to be a professional bit throughout.

We understand too that several from Nevada City are already chosen for the cast, some of the principals being drawn from here.

Mr. Pavilla stated that although rehearsals have not progressed as rapidly as he had anticipated nevertheless at this time they are well under way and the date for the show can soon be announced.

Pardon us for digressing a moment but we can throw an interesting sidelight from our own recollection, this same Mr. Pavilla played in this part of California in 1883 with the Fairweather Opera Company and he has been actively engaged in theatricals almost for the entire 39 intervening years and it seems to us that inasmuch as more characters are needed that this is an excellent opportunity to get theatrical training under the tutelage of this able director.

When asked about this feature of his activities, Mr. Pavilla said that he is most happy to be of assistance to anyone who wishes to get into the cast, giving them individual training if necessary and at no cost. The director is at the mercy of his cast like some of the oldtimers who were forced to make bricks without straw whatever that may mean, we once knew an east Indian who bartered perfectly with scraps of freshly broken bottle glass. And once upon a time we knew a youth who hollowed out a mammoth sweetp otato, and with the aid of plugs and nimble fingers and breath properly applied drew ou ful music from the gutted tuber.

Los Angeles, Construction to t soon n new Knights o Columbus c house at Ninth and onnie Brae streets.

MEN PREPARING RESERVOIRS FOR SLUICING

The French Corral mining district promises to be a busy place this winter when the water hits that region. The old Harrison French reservoir has recently been repaired and the water capacity has been nearly doubled. This work will greatly help in overcoming the working problem that has confronted miners during the past few years in working the gravel banks south of French Corral.

In the past it has been impossible to work the Harrison French mine and a portion of the Moulton holdings to the best advantage because of a gigantic washout in the reservoir. This washout happend four or five years ago when the opening of the overflow gate was neglected. During a big storm one night the reservoir filled to the overflowing point and of course washed the whole side of the bank out.

Considerable work has been done to put the reservoir in A-1 shape and it is now a better and bigger reservoir than it ever was before. Care will be taken so that another washout will not happen again.

Not far from the Harrison French diggings are two other reservoirs. These are now being repaired and put in shape for the winter supply of water which comes from the water shed between the South Fork of the Yuba river and French Corral. Sam Peckett and Bill Baker are in charge of the work and each will work one of the Moulton properties this winter season.

These two reservoirs are situated on top of the 60 foot gravel bank that the men will sluice. The fall will give them as big a head of water as they will need for sluicing purposes. Very little pipe will be needed as the water will be impounded so near the working gravel bank.

The gravel itself is of a semi-tight nature. When exposed to the elements for a period of time the gravel dries out and approaches the condition of the so called cemented gravel. This condition appears only on the outside surfaces of the exposed gravel. When this outer crust is broken into, the gravel is found to be moist and of a crumbly nature ,an ideal gravel for sluicing or hydraulicing purposes, except when found on the bed-rock. There nuggets of very good size have been found. In the old days some of them ran into values of hundreds of dollars.

The French Corral placer gold is said to be the purest of any gold in the state and will bring the highest price per ounce in California at the United States mint.

The renewed gold mining activity around French Corral, an outlying district of Nevada City, is just another indication of the returning prosperity to the gold mining in this territory.

NEVADA CO. TEACHER'S INSTITUTE TO BE HELD

This week the Nevada County Teachers will hold their institute at the Nevada City High School building in this city. The meetings will be held October 26th, 27th and 28th, according to Mrs. Austin, county superintendent of schools. The public is invited to attend at all of the meetings.

Instructors will be Mr. Willard Givens, city superintendent of Oakland schools, Mr. Sam H. Cohn, deputp superintendent of public schools in Oakland; Mrs. Wilson, penmanship specialist; Miss Eley, art specialist; Mrs. Hill, chief of mental hygiene from the state office and Mr. N. P. Neilson, chief of the Physical Education Department from the state office. Mr. Jerry Seawell will give the opening address.

Subjects in the elementary section will be art, primary reading, penmanship, and child guidance. The high school section will treat the subjects of fundamentals of education, large and small classes, life guidance, health and development, character and citizenship and school legislation.

FIRE DESTROYS DANCE HALL NEAR THIS CITY

Twin Cities Pleasure Hall is Completely Destroyed in Early Morning Blaze

Fire, discovered at four o'clock Sunday morning, completely destroyed the Twin Cities Pleasure Hall, about half way between Nevada City and Grass Valley.

The fire followed a dance given by the Veterans of Foreign Wars, and is believed to have originated in the ladies' dressing room, presumably from a match or cigarette. The building was partly covered by insurance.

The fire gained such headway that there was no chance to save the building and it was soon completely destroyed. Sunday morning the passing motorists saw only a pile of charred embers where the building had stood.

The Nugget is informed that the building will not be rebuilt, at the present site, and it is stated that the owners of the property are looking for another site.

HOUSE BURNS BUT ITS ONLY A PLAY HOUSE

This morning a house on upper Commercial Street burned clear to the ground. It took several of the Forest Service men and a good stream of water to stop the conflagration.

It was this way—Some weeks ago 10 year old Jimmy Larson and about seven of his school mates built a house in the rear of his grandfather George W. Erway's home on Commercial street. The house was made of boards and sacking and was quite a work of art for Nevada City's best 10 year old architects and carpenters.

The boys used the house as a "Club House" and were used to gather there for the most important meetings of the club. A stove was made for the interior and during these cold institute days the boys had looked forward to many a pleasant "Pow-wow" under the warming influence of the stoves heat waves.

But this morning something went wrong. The fire from the stove jumped out and lit on the wood pile. From there it caught on to the wall paper and then it was just a matter of time. The boys were game however, they fought fire until the bitter end.

An alarm was finally sent out and the forest service men at the shop next door turned out and plyed a stream of water on the flames.

But when the fire was out, chaos reigned. The "Club House" had been leveled to the ground and several feet of grass around it had been burned.

Strange to say, neither Jimmy nor any of his friends can be found for interviewing purposes. So you will have to take this story without their confirmation.

ARBOGAST ANNOUNCES SUPERVISOR CANDIDACY

In this issue will be found an announcement for Cary S. Arbogast, candidate for supervisor. Mr. Arbogast is the man who will oppose Supervisor Eddy in the November election. Arbogast ran strong in the primaries and his friends believe he has an excellent chance of being elected.

Mr. Arbogast was born and raised in Nevada county, and is thoroughly familiar with the problems of the first district. He promises the voters better roads and lower taxes. That is his principal argument in seeking the support of the voters and he is known as a man who keeps his word.

AGED MAN HAS STROKE

Jack Edmi who has spent most of his life in the Willow Valley district was found by friends in his yard this afternoon where he had n with a stroke of paralysis.

He has mining interests in the low Valley and Mount Oro district.

PROPOSITION NO. 4 UNFAIR TO AUTO OWNERS

Declaring that Proposition No. 4 (Senate Constitutional Amendment No. 22) on the ballot for the general election November 8, would make the general motoring public bear highway maintenance costs for certain truck and bus lines, the California State Automobile Association is opposing the measure in behalf of organized motorists of the state. It is further contended by the motorists' organization that Proposition No. 4 is a threat against the highway financing policy under which the state system of roads has been successfully developed.

H. J. Brunnier, chairman of the Highways Committee of the Automobile Association, in a statement setting forth the effect that Proposition No. 4 would have said:

"Highway users have willingly accepted certain special taxes for highway purposes. They have thereby contributed more than their share for an improvement which clearly benefits the whole state generally. It would be a break of faith, a dishonoring of a pledge to take my part of the money so raised and use it for other purposes than highway work.

"Proposition No. 4 would do just that. It would take the state's share of tax revenue on common carrier truck and bus lines from the highway fund and place it in the state general fund. In effect, this means that the general motoring public would be called upon to carry the burden of highway maintenance for trucks and buses whose tax payments would no longer be applied to the highways.

"This particular tax was imposed chiefly to take care of the greater wear and tear caused by thes trucks and buses. It was recognized as proper that something more than the gasoline tax should be paid by them.

"Proposition No. 4 is therefore manifestly unfair and, since the roads are built and maintained with money supplied by the motoring public, it is particularly unfair to motorists."

THE RESULT WILL AFFECT US ALL

An editorial in a recent issue of the Dairymen's League News said that there are two main reasons for low milk prics in the New York Milk Shed: (1) Low commodity prices generally, brought on by economic depression; (2) Price cutting by independent dealers obtaining their milk supplies from unorganized sources.

That situation is not pertinent to New York alone. It is found, in one phase or another, in every section of the country. All producers of farm products have suffered from low prices resulting from the twin factors of depression and lack of farmer organization.

Hard times will pass indeed, the end seems in sight now. But the other—and more important—price bogie can be eliminated only by the producers themslvs. Co-opratives, with every farmer in the territory working loyally, is the solution.

Organized dairymen are the best guarantee we can have of a soundly pricd, abundant supply of first quality pure milk. It should be emphasized that a fair price to the producer does not mean an excessive price to the consumer. It means only that a fair share of the selling price will go to the farmer. In addition, prosperity for agriculture is reflected in the lives and businesses of us all.

The farmers of the nation have their eyes on the New York milk shed where the Dairymn's League is working for a fair deal for the farmer. The result will mean much, not only to the future of agriculture, but the future of the nation at large.

HAS CAPITALISM FAILED?

"According to the Marx theory, the United States, as the most advanced capitalist country, should have been first to succumb to socialism. On the contrary, it has held out longest and best, and its first to begin recovery, simply through placing the government credit at the service of cities and states to provide work for the unemployed, not to pay them doles."—Oregonian.

Old Chinese Methods Used

Many people driving the Downieville highway have noticed the mining activities of a group of people just to the left of the highway going north on Shady Creek, about 12 miles from Nevada City. These people are mining deep down in the sands of Shady Creek which is nearly dry at this time of year.

Two families are operating the "mine" and seem to be making out all right so far. Mr. Frank Nugent of Whiting street, Grass Valley, is running the works. He is ably assisted by Mrs. Nugent, another couple and their son of about 17 years of age.

Their working scheme is patterned somewhat after the United States of Soviet Russia "five year plan," inasmuch as everybody works. Even the two ladies have their mining work cut out for them. One of them is the engineer and runs the automobile engine that transmits power to the cable spool, which in turn winds up the cable that draws the skip car bearing the sand up to the gravel dump.

From the gravel dump the gold bearing sand and gravel is shoveled into the 12 by 12 sluice boxes and the other lady miner works the gravel along the boxes, seeing that no foreign matter such a rocks or sticks gums up the works.

The method of digging the sand up from the river bottom is by means of a slow moving continuous belt with scoops attached. This belt is turned by means of a single cylinder heavy duty gasoline engine The belt is geared down so that it turns but about 30 feet a minute. At the proper time, the sand is spilled from the belt scoops into the skip car.

Mr. Nugent runs the actual mining end of the business. He is helped by the other man and the 17-year-old boy. Mrs. Nugent runs the sluice box end of the operation with the help of the other woman. That completes the Shady Creek "Five Year Plan." Everybody works and everybody participates in the profits.

The utmost secrecy regarding the result of their mining operations is maintained by the miners, but amid the whir of motors and the clang and clash of machinery, Mr. Nugent admitted "we are not starving."

The above picture gives some idea of the mechanical workings of the mine. The engine on the right side marked "Chinese pumping plant" powers the endless belt with scoops attached. In the old pioneer days the Chinese around this country used this same method except that they powered the belt by hand. From the scoops the sand is dumped into the car marked "Skip Car Bearing Gold-Sand." The ties that support the skip car track are made of rough pine logs that were cut near the diggings.

The "signal cord to woman engineer" is pulled when the men see that the skip car has a load. One of the women members of the party then starts the motor which is really an old truck engnie. Throwing in the controls, the motor driven spool then draws the skip car up to the gravel pile from where it is shoveled into the sluice boxes.

The mechanical operation of the mine is O. K. Whether the mine is going to pan out remains to be seen.

The Nugent Mining company all lives under one common bunk and cook house. The roof is a large square water-proof cavas. The walls are the great open spaces.

The mine has been in operation about two months, so of course it is a little early to estimate its true value. Much of the two months has been spent in development and mechanical construction work.

At present a large ditch has been dug across the river bed. This ditch is about 18 feet deep. There is perhaps 12 feet of water in it. Without using some such mechanical contrivance as shown above, it would be difficult to get the sand from the bottom of the ditch without either pumping out all the water or using a rock pump.

At any rate the group is to be commended for their support in trying out something new. Pioneers in any line of work are usually scoffed at, but the Nugget wishes these people all the luck in the world.

JACKSON MINE SELLS FOR HALF MILLION

Yesterday he was just a hard working miner and today he is in the ranks of the capitalist! That is the story of Peter Peterson of Jackson, Amador County. Just last week the hardy Danish prospector and miner signed his mine over to George Anderson and his associate, Bob Childers for the staggering fortune of $500,000,00.

Peterson's mine was not just an "overnight" find. He made his original discovery several years ago. Enlisting the aid of his son and one miner, he was able to put his mine on a small production basis about a year ago. From his small savings, Peterson bought a small three stamp mill.

Almost from the start the mine paid. Nearly every month Peterson cashed in at the United States mint anywhere from $2,300 to $4,000 This was cashed in despite the fact that the mill ran but a few hours each month. Peterson's find was so valuable that he had a large iron installed at the entrance of his "diggings" and this door was locked securely every night.

In the short space of a year, Peterson took out of his mine approximately $30,000.00. That was done with the work of only the three men. They worked on but two tunnels and neither one of them went back further than 65 feet. There are twelve stringers of ore leading into the main vein that have been worked by the men. The veins seem to grow richer as they are followed in. It is a free milling gold quartz ———leaf gold that can be knocked loose from the quartz into the palm of the hand. The value of the find can readily be seen from the rich returns.

Peterson was a Danish immigrant who came to the United States during the 80's and for years worked as a laborer. Later he came west and became interested in the glamour of gold. He bought a small ranch near Jackson and between chores, prospected and panned for what ever extra money he could get. After years of prospecting, he finally struck the quartz ledge on his own ranch. He did not hurry things along too much. Instead he took his time and developed the mine to such a stage that engineers could readily appreciate the value of the property. Finally just last week, Peterson sold his mine and with $500,000.00 in his jeans, he will not have to worry about the wolf at the door for some time to come.

A few such deals as this one are beginning to open the eyes of the "doubting Thomases." Moneyed interests are waking up to the fact that the California Mother Lode district still has many millions of dollars waiting to be developed in gold.

This sale should also encourage some of our own people who have mines of their own that need the backing of capital. We are in the heart of what is probably the richest gold country in America. Many good mining properties here need but the helping hand of capital

Proposition
No. 3
wears a false face!

Masquerading as "relief," as "remedial," as "beneficial" it is not what it seems.

Vote NO

It is not designed to give relief to any one, but to *convert every foreclosure into a law suit.*

It will increase deficiency judgments by making them automatic if sale bid does not cover all charges including attorneys' fees.

The pretended protection of the right to redeem is destroyed by compelling the owner to pay rent or be dispossessed in the event of foreclosure.

It will increase foreclosures by making renewals and new loans difficult and costly.

The rights of borrower and lender will be clouded by the many confusing provisions of the measure.

DUCK SEASON TO OPEN NOVEMBER FIRST

With the closing of the 1932 deer season in California, hunters are putting away their rifles and oiling up their shotguns preparatory to the opening of the duck season, set for noon November 1st. The season will close on December 31st, at sunset.

The State Fish and Game Commission will enforce the regulations of the Federal government as to waterfowl. This applies to the opening and length of the season, the bag and possession limits, and the limits a hunter may have of certain designated species of duck.

The bag limit per day is 15 ducks, and the number one may have in his possession at one time is 30. Of the bag limit, a hunter cannot kill more than ten in the aggregate of any of the following: canvasback, redheads, bluebills, ringnecks, spoon bills, gadwalls and all species of teal; nor have more than 20 of the same in his possession.

For geese the bag limit is four per day, eight in possession, and mudhens, 25.

Not more than 25 live duck decoys may be used, and goose decoys are prohibited.

Hunters may shoot every day of the season, except on commercial gun clubs when the shooting is limited to Saturdays, Sundays and Wednesdays, opening and closing days and legal holidays.

Night shooting is illegal. It is not legal to shoot waterfowl from sail boat or airplane; or to use a scull boat in districts 8 and 9 except on Wednesdays and Sundays, or at any time ni district 12 or in the Napa river south of Edgerly Island. Hunters must not use a gun larger than 10 gauge, nor an extension automatic or cane gun.

Reports received from various portions of the state indicate there will be plenty of ducks this year. On state owned refuges more ducks have nested and raised their young this year than has been noted since the refuges were established.

COMPLAINT IS FILED AGAINST TRUCK OPERATOR

A complaint has been filed with the Railroad Commission against W. F. Bennetts, of Sacramento, operating a truck line out of Sacramento through Loomis, Penryn, Newcastle, Auburn, Grass Valley and Nevada City as common carriers without a certificate of public convenience and necessity from the railroad commission.

The commission is asked to issue its orders directing Mr. Bennetts to cease and desist from such operation to take effect at once.

MURCHIE MINE RECEIVES TWO CARLOADS MACHINERY

The Murchie mine has received a large new pump. The pump took up two full cars of the Nevada Co. Narrow Gauge company.

Upon installation of the new pump the Murchie will be enabled to increase the number of drilling machines used.

LABOR MANAGEMENT IN WESTERN MINES

The practices followed by successful metal-mine operations throughout the country in the management of labor have been collected and summarized in a recent publication of the United States Bureau of Mines, written by C. W. Wright, chief engineer, Mining Division. The report should be of particular interest to managers of metal mines who, in addition to the worry caused by decline in metal prices and markets, are beset by problems relating to employes that are of minor importance in normal times.

The circular is one of a series dealing with mining problems and in it are summarized the data bearing on this subject contained in earlier papers of the series which number of individual mines. These data are supplemented by information obtained through special correspondence and are discussed by the author from a background of many years' experience in mine operation and management.

A general discussion of staff an employes organization in which are included typical organization charts is followed by discussions of the functions and responsibilities of manager, staff, foreman and lesser supervisory officials, and their relationship to the workmen.

Pay spstmes in vogue in the principal metal mines of the United States, Canada, and Mexico are then terated in a broad manner and the advantages and the disadvantages of day's pay, contract, bonus, and leasing systems of payment are are respectively pointed out. There then follows a more detailed outline of the practices at typical mines with respect to payment for development work, stoping, tramming, drilling, shovelling, etc. In this section are presented typical methods employed for the determination of unit prices for different classes of work where payment is on a piece work, contract or bonus basis.

The circular concludes with a brief discussion of welfare work and with statements by certain prominent mine managers regarding the principles of successful mine management.

Further details are given in Information Circular 6650, "Management of Labor in Successful Metal-Mine Operations," by Charles Will Wright, copies of which may be obtained free of charge from the United States Bureau of Mines, Washington, D. C.

LOCAL HAPPENINGS

Henry Paine, mining man of Lake City, was a visitor in Nevada City over the week-end.

Miss Louise Schreiber is spending institute week in San Francisco with relatives and friends.

Mr. and Mrs. Arthur Hoge have returned from their honeymoon in southern California, Arizona and Mexico.

Louis Riley of the Nevada City Valley meat market, motored to Sacramento to visit friends yesterday.

It is understood that the Hussey mine in Willow Valley has been taken over by a mining company. It is a quartz mine.

Fenton Fleming, of Sacramento, spent Sunday in Nevada City with his brother, Lenaar Fleming and family.

Mrs. Fred DeGuire, who has been on the sick list for the past week, is on the improve and will soon be enjoying good health again.

William B. Selino, who has been ill for several days, was able to be out and enjoy the fresh air Sunday for the first time.

Mr. and Mrs. Don Carlos Billick drove quite a ways north on the Downieville highway yesterday. Billick attended to some business on the way.

Miss Clara Angiolini, of San Francisco, and R. Pratt, of Isleton, came up to attend the wedding of Miss Toccalini and Don Steger, which occurred yesterday at high noon.

Nye Johnson, owner of the Bret Harte Dairy, has been confined to his home for a day or two with a form of "flu" which seems to be going around.

Robert Allen received the announcement this week of the approaching marriage of his nephew, a Mr. Daniels, who makes his residence in Chicago.

Mrs. C. B. Anderson, of Roseville, moved into an apartment on Main street last Friday, where the Anderson family will be at home from now on.

Mr. and Mrs. E. F. Cassidy are spending a few days in San Francisco. They will visit their daughter and Mr. Cassidy will attend to business matters, thus combining business with pleasure.

Hubert B. Starr and Glen Smith, operators of the Annie Laurie quartz mine between Colfax and Forest Hill, were in town Saturday evening on business. The men are contemplating sluicing operations in French Corral this winter.

Mr. and Mrs. Wesley Davis of Sacramento were in Nevada City over the week-end visiting relatives. Mr. Davis is the son of Will Davis of the Hideaway Park and Camp of Willow Valley.

Miss Beatrice Eddy who has been visiting with her mother, Mrs. Mabel Eddy of Grass Valley, motored back to her home in Aakland Saturday. Miss Eddy has been with her mother for a fortnight.

A new mill has been erected just to the east of the old Oustamah mill about a mile west of this city. It has been heard that a mining man is doing some prospecting work on the Oustamah property.

Arthur Swanson of this city made a hurried business trip to Sacramento and way points last Thursday and Friday. An illness overtook him while away and friends will be glad to learn that he is nearing recovery now.

Lorren Williams, while looking after some repair work on his home yesterday, slipped and fell to the ground, breaking a rib and injuring his right shoulder. Doctor Tickell attended hte injured man and at the present writing he is getting along fine.

One-Month-Old Movie Actor

Richard Corbett Sielaff, one month old, of Detroit, Mich., is the youngest contract motion picture player in the world. A prominent motion picture company offered a year's contract in pictures to the first baby born on a certain date. Richard was born one second after midnight on the morning of that day, to win the prize. Richard is shown above with his mother, Rose Lillian Sielaff.

Continued from page one

YOUNG PEOPLE WEDS AT LOCAL CHURCH

of St. Mary's Academy at Grass Valley. Mrs. Steger has demonstrated her splendid talent as a stenographer by holding for the past three years a position with the California State Department of Agriculture, resigning her position only recently to return to her home and become a bride.

Many friends have held social affairs in her honor during the past few weeks. Sacramento friends vieing with others in entertaining her.

Mr. Steger, the groom, is the son of Robert P. Steger and Mrs. Steger of this city and is associated with his father in the building contractor work. He is a young man of splendid characteristics, upright and manly and he enjoys the friendship of a large circle of friends who extend to him and his bride their best wishes for a long and happy married life.

On their return from their honeymoon, Mr. and Mrs. Steger will make their home in this city.

After the wedding the bridal party and guests partook of an elaborate wedding breakfast at the National Hotel where the tables in the upper dining room had been decorated in the colors of pink and yellow.

The artistry of the decorations in the church was planned and carried out by Lloyd Penrose, close friend of the bride and groom, and was a tribute of his friendship for them.

Scot Rundy, the violinist who accompanied Mrs. Rosetta Johns in her rendition of the wedding march on the organ, is also a loyal friend of the newly married couple, and contributed a share of his splendid musical talent for the pleasure of the assembled wedding guests.

Among the out-of-town guests who attended the wedding of Miss Toccalini and Mr. Steger were the following:

From San Francisco: Mr. and Mrs. Frank Bartalini, Dr. George Jarvis, Mr. and Mrs. Dominic La Barba, Mr. and Mrs. Joe Bowles, Sacramento, Mr. and Mrs. John Toccalini, Mr. and Mrs. George Fraga, Mr. John Toccalini, Mr. and Mrs. Pirro Bartalini, Mr. and Mrs. Frank Toccalini, Mr. Joe Taccalini, Mr. Joe La Barba, Mr. and Mrs. Fred Curtis, Mrs. Kenneth Amendth, Charlotte Bowman, Mr. Eldridge Drew, Mr. and Mrs. Ted Lewis.

BIRTHDAY PARTY

Mrs. Clyde Garwood entertained at a birthday party in honor of her Daughter Doris's sixth year. Refreshments were served in the afternoon. The following children were present: Roland Chenoeweth, Billy Chenoeweth, Moyola Jean Marsh, Alice Hammond, Betty Jane Lewis, Betty Scott, June Chenowich, Billy Jones, Billy Wright, Joyce Deal, Billy Tobiasian, Freddie Fontani, Mary Cartiselli, Janice Crispon, Bonice Love, Donald Richard Dillingham, also Miss Bernice Garwood, Miss Violet Garwood, Mr. Clyde Garwood and Mrs. H. B. Wright.
